PostDoc in Machine Learning at ELLIS Munich

Who are we?

[ELLIS Munich](#) is an [ELLIS](#) unit integrating expertise from the Technical University of Munich, Helmholtz Zentrum München, and collaborating partners. Our unit focuses on developing novel Machine Learning (ML) methods and deploying them in Biomedicine, Computer Vision and Earth Observation. We contribute to the ELLIS programs on Computer Vision, Health, Earth & Climate, Natural Language Processing and Semantic, Symbolic & Interpretable Machine Learning.

Who are we looking for?

We are looking for excellent PostDoc researchers in the field of machine learning in its broader sense – including Computer Vision, Biomedical Data Analysis, Earth Observation, NLP and more – with a strong track record in the respective area and background in mathematics, informatics, physics or related fields.

What do we offer?

ELLIS Munich offers a great interdisciplinary environment for machine learning foundations and applications. We are dedicated to training the next generation of interdisciplinary scientists by contributing to the ELLIS PhD program and promoting cutting edge research.

Suitable candidates will be employed according to TV-L E13/E14 for up to 6 years. It is also possible to grant research scholarships.

What next?

Please visit our [webpage](#) for more information on our unit. To apply, please contact us via contact@ellismunich.ai. Please include your CV with a publication list, two recommendation letters, and a short cover letter detailing on which topics and with [whom](#) you would like to work. Please explicitly describe your experience in the chosen topics.

We are looking forward to your application!
